

Getting ready for the big day!

You've signed a contract with Guideline Roofing, and we're ordering your materials, scheduling our crews, and it's almost time for your new roof.

Here's everything you need to know and do to be ready for our crews to get to work to restore your roof and your peace of mind.

Your install is planned for

- 6 AM 7 AM 8 AM 9 AM

(based on time of sunrise and the size of your roof)

between _____

- The date may be moved a few days forward/backwards due to the weather forecast, material availability, or crew schedule conflicts

Prepare your home for the installation

- Move all vehicles away from the house
 - Park on the driveway well away from the house, or
 - Have them parked on the street
- Leave room for trucks and materials to be delivered
 - The trucks for hauling away waste shingles and construction debris are large and wide, please leave plenty of room for clearance beside your vehicles as well as room for them to park close to your home.
- Secure your pets and animals
 - Gates will be opened and kept open while our crews are moving quickly and efficiently to complete your new roof installation in a timely manner. Pets who are stressed by lightning or fireworks may need to be boarded elsewhere.

Note: In order to minimize chances of weather interfering with completion, our goal is to complete the entire installation in one day if at all possible, **and we will be constantly moving around all sides your home.** Our crews will take all due care and caution to protect your landscaping, however, we cannot be liable for wear and tear to your lawn from high traffic during the installation and removal of debris.

What's going to happen on the big day?

On a full roof replacement, as per the estimated scope of work, you will see the following steps occur.

1. Your existing roof will be removed down to the deck.
 - Any rotten deck boards will be replaced (2 replacements included).
2. Ice & Water Shields in all valleys based on slope.
3. Entire roof covered and sealed with new, synthetic felt.
4. Drip edge and starter shingles installed.
5. New pipe boots and flashing installed as applicable.
6. New shingles installed.
7. New ridge vents installed.
8. Your old roof debris hauled away.
9. Your yard and driveway will be magnetically swept for nails with extreme thoroughness.

We will all celebrate your new roof that will protect your home and family for years to come!
